

Executive Summary

Dataset

8,173 usable incident records from Astram event data_anonymized - Astram event data_anonymizedb40ac87.csv.

Executive Summary

What FLEXUS Does

FLEXUS analyzes urban incident patterns, identifies hotspots, clusters similar event DNA, estimates incident risk, scores corridor resilience, and generates rule-based operational recommendations.

Executive Summary

What FLEXUS Does Not Do

It does not predict traffic speed, volume, density, routes, or congestion propagation because those columns are not present in the dataset.

Executive Summary

Top Causes
